INFORMATION AND SOFTWARE TECHNOLOGY

Article index

Volume 36

Number 1

CSPL: a process-centred environment
Jen-Yen Chen and Chia-Ming Tu 3
Problem solving strategies for open-systems based organization decision support systems
Rajeev Kaula 13
The use of Prolog in the modelling and evaluation of structure charts
T. H. Tse, T. Y. Chen and C. S. Kwok 23
OO oversold
A. Bryant and A. Evans 35
Viewpoint specification and Z
M. Ainsworth, A. H. Cruikshank, P. J. L. Wallis and L. J. Groves 43

Number 2

Improving object-oriented analysis
Gabriel Eckert and Paul Golder 67
Semantic correspondence in integrating CASE tool repository schemas
C. N. G. Dampney and R. M. Colomb 87
Using machine apprentices for transient knowledge work
Gregg Elofson 97
AIDA: a dynamic analyser for Ada programs
F. E. Eassa, L. J. Osterweil and M. Z. Abdel-mageed 107
Making C^{++} a persistent OOPL
Rui Chen, Xi-yao Cai and Ping Chen 119

Number 3

Binary ranking for the signature file method
D. Dervos, P. Linardis and Y. Manolopoulos 131
Data conversion rules from network to relational databases
Joseph Fong and Chris Bloor 141

PII: S0950-5849(98)00113-X

Hierarchical Censored Production Rules (HCPRs) system employing the Dempster–Shafer uncertainty calculus
K. K. Bharadwaj, Neerja and G. C. Goel 155
Information cost as a determinant of system architecture
Levent Orman 165
Software measurement methods: recipes for success?
John Roche and Mike Jackson 173

Number 4

Hypermedia link services and their application to multimedia information management
Wendy Hall and Hugh Davis 197
System support for multimedia applications: an assessment of the state of the art
Gordon S. Blair, Geoff Coulson and Nigel Davies 203
Time-varying Sensitive Regions in dynamic multimedia objects: a pragmatic approach to content-based retrieval from video
Victoria Burrill, Thomas Kirste and Jochen Weiss 213
Systematic design for task related multimedia interfaces
Alistair Sutcliffe and Peter Faraday 225
Retrieval and delivery of information in multimedia database systems
F. Golshani and N. Dimitrova 235
On the promises of multimedia authoring
Stephen W. Smoliar 243

Number 5

Predicting the development effort of multimedia courseware
I. M. Marshall, W. B. Samson, P. I. Dugard and W. A. Scott 251
The information content and user driven aspects of the ACT-IT multimedia authoring system
B. Inwood, I. Connell, R. Scane, J. Collyer, B. Christie, V. Ashcroft, I. Brown and J. Knight 259

A phased approach to the evaluation and selection of CASE tools
Louis A. Le Blanc and Willard M. Korn 267
Evidence on economies of scale in software development
Rajiv D. Banker, Hsihui Chang and Chris F. Kemerer 275
A meta-model of information systems to support reverse engineering
M. J. Freeman and P. J. Layzell 283
PM-Net: a software project management representation model
Kuen-Ching Lee, Iuan-Yuan Lu and Hsin-Hui LIn 295

Number 6

Object-oriented modelling of hyperstructure: overcoming the static link deficiency
H. Maurer, N. Scherbakov, K. Andrews and P. Srinivasan 315
A semantic database approach to knowledge-based hypermedia systems
Paul Beynon-Davies, Douglas Tudhope, Carl Taylor and Christopher Jones 323
(In)completeness in specifications
V. S. Alagar and D. Kourkopoulos 331
Modelling and simulation in an object-oriented environment
Cheng-Jye Luh 343
Developing transputer-based systems using HOOD and Parallel C
Paul Moore and Peter G. O'Donoghue 353
A matrix editor for a metaCASE environment
Steven Kelly 361

Number 7

Software engineering for parallel systems
Innes Jelly and Ian Gorton 381
Parallel software development using an object-oriented modelling technique
Chris Knowles and Pete Collingwood 397
Graph-based software construction for parallel message-passing programs
Guido Wirtz 405
Design and code derivation in the PCSC methodology
Gordon A. Manson, Shahrin Sahib and Chandran Elamvazuthi 413
A portable parallel programming environment based around PCTE
Stephen A. Hellberg and Ed. Zaluska 419
TOPIC-SE: a tool-based open platform for integration of control in software environments
Karim Foughali and Bertil Folliot 427
A Petri net based methodology to integrate qualitative and quantitative analysis
Monika Heiner, Giorgo Ventre and Dietmar Wikarski 435
Use of GSPNs for concurrent software validation in EPOCA
Susanna Donatelli, Giuliana Franceschinis, Marina Ribaudo and Stefano Russo 443
Engineering safety-related parallel systems
C. I. Birkinshaw, P. R. Croll, D. G. Marriott and P. A. Nixon 449
Modelling parallel program behaviour in ALPES
João Paulo Kitajima and Brigitte Plateau 457
Neutral debugging using grafts
Serge Chaumette 465

Number 8

The economics of reuse: new approaches to modelling and assessing cost
Shari Lawrence Pfleeger and Terry B. Bollinger 475
On decision tree verification and consolidation
David Chenho Kung 485
Enhancing software reusability through effective use of the essential modelling approach
Soheil Khajenoori, Darrell G. Linton and Carl A. Morris 495
Object-oriented methodologies of Coad and Yourdon and Booch: comparison of graphical notations
F. Losavio, A. Matteo and F. Schlienger 503
Automated dismemberment of JSD process specifications
Andrew Bass and Bryan Ratcliff 515

Number 9

Non-use phenomenon of CASE tools: Malaysian experience
M. H. Selamat, C. Y. Choong, A. T. Othman and M. M. Rahim 531
Dialogue specification and control: a review of models and techniques
David T. Clark and Geoff P. Crum 539
View definition in an object-orientated database
S. R. Monk 549
Design of Sentinel: an object-oriented DBMS with event-based rules
S. Chakravarthy, E. Anwar, L. Maugis and D. Mishra 555

An annotated bibliography for object-oriented analysis and design
S. Webster 569

Number 10

Modelling the CASE process: empirical issues and future directions
Stephen King and Robert Galliers 587
Visualizing advanced data modelling constructs
Ghassan al-Qaimari, Norman W. Paton and Alistair C. Kilgour 597
Compiler test suite: evaluation and use in an automated test environment
A. Boujarwah and K. Saleh 607
A reachability tree for statecharts and analysis of some properties
P. C. Masiero, J. C. Maldonado and I. G. Boaventura 615
A selective enumeration based heuristic for rule allocation
Mukesh K. Mohania and N. L. Sarda 625

Number 11

Problems in CASE introduction: experiences from user organizations
Ivan Aaen 643
Enactable process specification in support of process-centred environments
Alan M. Christie 655
The formal specification of concurrent systems: a small CCS case study
I. M. Bradley 667
Formal methods and design extraction: a pilot study
Padmanabhan Krishnan 675
An object-oriented modelling approach to system software design
P. J. Lee, D. J. Chen and C. G. Chung 683

Number 12

Translating VDM specifications into ABC programs
Aaron Kans and Clive Hayton 699
Optimistic priority-based concurrency control protocol for firm real-time database systems
Jinhwan Kim and Heonshik Shin 707
A tutorial on secure database systems
George Pangalos 717
Genetic algorithms for optimal logical database design
P. van Bommel, ThP. van der Weide and C. B. Lucasius 725
The design of the user interface for a large physics experiment
G. Manduchi, G. Fregonese, C. Taliercio, T. W. Friedian and J. A. Stillerman 733
Design and development of EASEL: a portable UIMS tool
Francis Neelamkavil and Joseph Drumgoole 743

Volume 37

Number 1

Towards a benchmark for the evaluation of software testing techniques
James Miller, Marc Roper, Murray Wood and Andrew Brooks 5
Object-oriented development for telecommunication services
Panos Fitsilis 15
High-level algebraic Petri nets
Chieh-Ying Kan and Xudong He 23
Photi-a fisheye view of bubbles
Neville Churcher 31
Representation for program control structures by rewriting of flow graphs
Norihide Hattori and Naohiro Ishii 39
A structured specification of an active database system
Jack Campin, Norman W. Paton and M. Howard Williams 47

Number 2

Recovery of object-oriented design from existing data-intensive business programs
Hee Beng Kuan Tan and Tok Wang Ling 67
Structured method for designing subsystems
Peretz Shoval 79
An optimizing retargetable code generator
M. Ancona 87
Debugging multi-agent systems
Marc H. Van Liederkerke and Nicholas M. Avouris 103
When to prototype: decision variables used in industry
Bill C. Hardgrave 113
Evaluation of process tools in systems analysis
Narasimhaiah Gorla, Hao-Che Pu and Walter O. Rom 119

Number 3

Query evaluation and optimization in deductive and object-oriented spatial databases
Wei Lu and Jiawei Han 131

Application of clustering techniques to information systems design
Tzvi Raz and Alan T. Yaung 145
Object-orientation as structural, functional and behavioural modelling: a comparison of six methods for object-oriented analysis
Juhani Iivari 155
Domain data typing
David Livingtstone 165
InterSect_DM: a hypertext data model based on OODBMS
Bing Wang and Peter Hitchcock 177

Number 4

A field study of the relationship of information flow and maintainability of COBOL programs
Michael M. Pickard and Bradley D. Carter 195
MGA: Rule-based specification of active object-oriented database applications
Peter Sawyer and Ian Sommerville 203
Static analysis of functional programs
K. G. van den Berg and P. M. van den Broek 213
A methodology for reverse engineering hierarchical databases
Filippo Tangorra and Domenico Chiarolla 255
Efficient manipulation of a set of fragments
George S. Pavlides 233
Architectural requirements for open distributed hypermedia
I. Gaviotis and D. Christodoulakis 245

Numbers 5–6

Editorial
Jonathan Bowen and Mike Hinchey 258
Making formal methods education effective for professional software engineers
David Garlan 261
A shallow embedding of Z in HOL
Jonathan Bowen and Mike Gordon 269
Using Z to specify telephone features
Peter Mataga and Pamela Zave 277
Rigorous specification using structured systems analysis and Z
K. C. Mander and F. A. C. Polack 285
The programming language Z-
Samuel H. Valentine 293
Formal development in B Abstract Machine Notation
K. Lano and H. Haughton 303
Annotated Z bibliography
Jonathan Bowen, Susan Stepney and Rosalind Barden 317
Glossary of Z notation
Jonathan P. Bowen 333
Report on Z User Meeting (ZUM '94)
Jonathan Bowen and Mike Hinchley 335

Number 7

Presenting dynamically expandable hypermedia
C. A. Macnee, W. Behrendt, J. R. Kalmus, K. G. Jeffery and M. D. Wilson 339
A conceptual model of cognitive complexity of elements of the programming process
S. N. Cant, D. R. Jeffery and B. Henderson-Sellers 351
Toward a classification scheme for software process modelling approaches
I. R. McChesney 363
An algorithm for distributed mutual exclusion
Pranay Chaudhuri 375
A survey of schema versioning issues for database systems
John F. Roddick 383

Number 8

Valuation-directed specification of communication systems
Robert Probert, Kassem Saleh and Hua-Long Yu 403
Deriving algebraic Petri net specifications from structured analysis — a case study
Chieh-Ying Kan and Xudong He 411
A path generation method for testing LCSAJs that restrains infeasible paths
N. Malevris 435
An approach to the design of object associations
J. Ayre, F. G. Wilkie and J. G. Hughes 443
Parallelization of hierarchical censored production rules
K. K. Bharadwaj and R. Varshneya 453

Number 9

The use, limitations and customization of structured systems development in the United Kingdom
Colin J. Hardy, J. Barrie Thompson and Helen M. Edwards 467
Incremental view maintenance in extended relational databases
John V. Harrison 479

An attribute grammar approach to high-level automated hardware synthesis
George Economakos, George Papakonstantinou and Panayotis Tsanakas 493
Multidatabase interoperability in the Jupiter system
John Murphy and Jane Grimson 503
Time-to-completion factors in packaged software development
Erran Carmel 515

Number 10

Selective regression testing-assumptions and fault detecting ability
Hareton K. N. Leung 531
Type safety and behavioural inheritance
Robert G. Clark 539
Implementing Prolog Definite Clause Grammars with SLR(1) parsers on the Relational Algebra Accelerator
Greg Michaelson 547
Deriving distributed processes from concurrent processes
Padmanabhan Krishnan 557
Relational algebraic framework for the modelling and analysis of Petri nets
Young Chan Kim and Tag Gon Kim 563
Cardinalities in depth: a formal approach to partial validation of conceptual schema
G. Grosz and S. R. Schwer 572
A software engineering environment driven by event-condition-action rules and its trigger mechanism
Walcélio L. Melo, Noureddine Belkhatir and Jacky Estublier 580

Number 11

Flexibilization of the methodology of system development
Gertjan Vlasblom, Daan Rijsenbrij and Matthijs Glastra 595
Domain object identification through events and functions
Danny C. C. Poo and Shwu-Yi Lee 609
A survey of current practice in aerospace software development
Robert T. Plant and Panagiotis Tsoumpas 623
Transformational data refinement and VDM
D. J. Andrews and D. C. Ince 637

Number 12

On the use of dynamic feedback in knowledge base system design
P. A. Dearnley and D. J. Smith 659
Deploying realistic estimation (field situation analysis)
Bernard Londeix 665
A case study of a difficult refinement: a fast dictionary for spell-checking program
D. J. Andrews and D. C. Ince 671
Evaluating the quality of entity relationship models
Someswar Kesh 681
Supporting production rules using ECA rules in an object-oriented context
Norman W. Paton 691
Estimating the quality of functional programs: an empirical investigation
R. Harrison, L. G. Samaraweera, M. R. Dobie and P. H. Lewis 701
Time to travel to target cylinders on non-linear discs with two independent seek arms
Ken Deighton 709

Volume 38

Number 1

Modelling the semantics of multitasking facilities in Concurrent C using Petri nets
A. Boujarwah, K. Saleh and N. Al-Seif 3
The processing strategy for the NF^2 relational frc-interface
T. Niemi, K. Järvelin 11
A method to remove variations in source codes
N. Hattori, N. Ishii 25
A closer look at programming expertise: critical survey of some methodological issues
P. Návrat 37
Object-oriented systems: a cross-discipline overview
O. Díaz 47

Number 2

Expert judgement as an estimating method
R. T. Hughes 67
Read this and change the way you feel about software engineering
J. Low, J. Johnson, P. Hall, F. Hovenden, J. Rachel, H. Robinson and S. Woolgar 77
Using timed CSP during object-oriented design of real-time systems
P. G. O'Donaghue and M. E. C. Hull 89
DITSE: an experimental distributed database system
C.-Y. Ni and S.-M. Yuan 103
The automatic generation of test cases for optimizing Fortran compilers
C. J. Burgess and M. Saidi 111

Priority inheritance protocol in Ada 95
J. Abu-Ras 121

Number 3

Beyond software factories: concurrent-development process and an evolution of software process technology in Japan
M. Aoyama 133
Software products evaluation system: quality models, metrics and process — International standards and Japanese practice
M. Azuma 145
Quantitative analytic approaches in software engineering
K. Torii and K. Matsumoto 155
Software reuse in Japan
S. Isoda 165
The software quark model: a universal model for CASE repositories
T. Ajisaka 173
MENDELS ZONE: A parallel program development system based on formal specifications
S. Honiden, A. Ohsuga and N. Uchihura 181
Knowledge-based cognitive support for multimedia information design
K. Nakakoji, A. Aoki and B. N. Reeves 191
IntelligentPad as meme media and its application to multimedia databases
Y. Tanaka 201
GUNGEN: groupware for a new idea generation support system
J. Munemori and Y. Hagasawa 213
Computer-supported meeting environment for collaborative software development
E. Kuwana, E. Yana, Y. Sakamoto, Y. Nakamure and K. Horikawa 221
Software technologies created in Japan
T. Takeshita 229
The TRON project
K. Sakamura 239

Number 4

Evolution and issues in metaCASE
S. Kelly and K. Smolander 261
Method engineering for multi-perspecitve software development
B. Nuseibeh, A. Finkelstein and J. Kramer 267
Method engineering: engineering of information systems development methods and tools
S. Brinkkemper 275
Ontology as a foundation for meta-modelling and method engineering
Y. Wand 281
Functionality and architecture of PSEEs
A. Fuggetta 289
The MEMA-model: towards a new approach for method engineering
T. Punter and K. Lemmen 295

Number 5

Challenges in the successful transfer of formal methods technology into industrial applications
H. Saiedian and M. G. Hinchey 313
An exercise in modelling
D. Andrews 323
Repositories for co-operative information systems
H. Wang 333
Generating test data for distributed software using the chaining approach
R. Ferguson and B. Korel 343
Model-based support for business re-engineering
S. Jarzabek and T. W. Ling 355

Number 6

Communications software reverse engineering: a semi-automatic approach
K. Saleh and A. Boujarwah 379
Estimating CASE development size from outline specifications
S. Cockcroft 391
Communicating X-machines
J. Barnard, J. Whitworth and M. Woodward 401
Exploiting object-oriented methods for multi-modal trip planning systems
J. E. McCormack and S. A. Roberts 409
An executable specification language for specification understanding in object-oriented specification reuse
S.-C. Chou, J.-Y. Chen and C.-G. Chung 419

Number 7

An evaluation of code metrics for object-oriented programs
R. Harrison, L. G. Samaraweera, M. R. Dobie and P. H. Lewis 443
Sharing objects as structural defects in object-oriented programming without safe typing
D. Rine 451

A comparison of ORN to other declarative schemes for specifying relationship semantics
B. K. Ehlmann and G. A. Riccardi 455
Migration from relational to object-oriented databases
S. Monk, J. A. Mariani, B. Elgalal and H. Campbell 467
Programmers' performance on structured versus nonstructured function definitions
K. G. van den Berg and P. M. van den Broek 477

Number 8

Object-oriented design: exception handling and copying
D. C. Rine 499
Wavefront: a goal-driven requirements process model
M. F. Theofanos and S. L. Pfleeger 507
A mixed approach for the formal correctness proof of distributed programs
G. Manduchi 521
Concurrent object-oriented programming using term graph rewriting techniques
G. A. Papadopoulos 539

Number 9

A new approach to ADT specification support based on reuse of similar ADT by the application of Case-Based Reasoning
P. Termsinsuwan, Z. Cheng and N. Shiratori 555
An efficient process migration algorithm for homogeneous clusters
K. H. Al-Saqabi and K. A. Saleh 569
Performance of a two-phase commit protocol
B. C. Desai and B. S. Boutros 581
Extending classical functional dependencies for physical database design
T. W. Ling, C. H. Goh and M. L. Lee 601

Number 10

Using joint application design to develop readable formal specifications
R. B. Jackson and D. W. Embley 615
Replicated servers for fault-tolerant real-time systems using transputers
A. Sinha, P. K. Das and D. Basu 633
Issues in co-operative software engineering using globally distributed teams
I. Gorton and S. Motwani 647
Behavioural modelling in object-oriented methodology
P. K. O. Chow and D. S. Yeung 657

Number 11

Software evolution: past, present and future
K. Bennett 673
Feedback in the software evolution process
M. M. Lehman 681
Software faults, software failures and software reliability modeling
J. C. Munson 687
A method for application management maturity assessment
R. M. Hather, E. L. Burd and C. Boldyreff 701
Improving reverse engineering models with test-case related knowledge
P. Benedusi 711
Is modularization always a good idea?
L. Hatton 719
Software evolution management: a process-oriented perspective
D. S. Hinley 723

Number 12

Requirements specification of real-time systems: temporal parameters and timing-constraints
T. G. Kirner and A. M. Davis 735
Prototyping: some new results
N. Cerpa and J. Verner 743
Integrated Estelle and ASN.1 specification approach to automatic implementation of application protocol
R. Lai and A. Lo 757
Proportional sampling strategy: guidelines for software testing practitioners
F. T. Chan, T. Y. Chen, I. K. Mak and Y. T. Yu 775
Australian managers' perceptions, attitudes and use of information technology
G. J. O'Brien and W. D. Wilde 783

Volume 39

Number 1

Methodologies for information systems investment evaluation at the proposal stage: a comparative review
T. J. W. Renkema and E. W. Berghout 1
A unifying framework for conceptual data modelling concepts
P. J. M. Frederiks, A. H. M. ter Hofstede and E. Lippe 15

A method for the recovery of inclusion dependencies from data-intensive business programs
H. B. K. Tan and T. W. Ling 27
Establishing relationships between specification size and software process effort in CASE environments
S. G. MacDonnell 35
A theoretical formulation for degrees of isolation in data bases
V. Atluri, E. Bertino and S. Jajodia 47
Software cost estimation using an Albus perceptron (CMAC)
B. Samson, D. Ellison and P. Dugard 55

Number 2

Engineering a library of reusable conceptual components
S. Castano and V. De Antonellis 65
An approach towards parallelisation of sequential programs in an interactive environment
N. Mukherjee and P. K. Das 77
Design transformation and prototyping using multiple viewpoints
G. Friel and D. Budgen 91
Combining process modelling methods
G. Abeysinghe and K. Phalp 107
Parallel data paths in two-headed disk systems
A. Vakali and Y. Manolopoulos 125

Number 3

A system for query comprehension
H. C. Chan, K. K. Wei and K. L. Siau 141
Distributed query optimization using two-step pruning
H. Kim, S. Lee and H.-J. Kim 149
Control and coordination of heterogeneous transaction processing systems
R. Bose and S. D. Burd 171
Rule handling in the day-to-day resource management problem: an object-oriented approach
K. X. Thrampoulidis, C. Goumopoulos and E. Housos 185
Predictive capacity planning: a proactive approach
C.-L. Sia and Y.-S. Ho 195
Integrating conflicting requirements in process modeling: a survey and research directions
C. Francalanci and A. Fuggetta 205
Letter to the Editor
Are software failures deterministic?
M. Neil 217

Number 4

Adequate testing of hypertext applications
L. Jin, H. Zhu and P. Hall 225
CASE tool construction for a parallel software development methodology
J. P. Gray 235
Queries on two headed fast disks with smart track management using dynamic scans
K. Deighton 253
Interactively extracting internal program information in language-based editing systems
W. X. Li 261
A new fault localizing method for the program debugging process
L. Lian, S. Kusumoto, T. Kikuno, K.-i. Matsumoto and K. Torii 271
Statistical power and its subcomponents — missing and misunderstood concepts in empirical software engineering research
J. Miller, J. Daly, M. Wood, M. Roper and A. Brooks 284
Factors affecting design inspection effectiveness in software development
T. Raz and A. T. Yaung 297

Number 5

A CASE tool to support critical success factors analysis in IT planning and requirements determination
D. J. Flynn and E. A. Arce 311
Tool support for systems emergence: A multimedia CASE tool
S. King 323
DEVICE: Compiling production rules into event-driven rules using complex events
N. Bassiliades and I. Vlahavas 331
SQL Tutor+: A co-operative ITS with repository support
H. Wang 343
bclasses: A construct and method for modelling co-operative object behaviour
B. R. Marshall, J. B. Kennedy and P. J. Barclay 351
Statistical analysis of nonstationary software metrics
K. Pillai and V. S. S. Nair 363

Number 6

The formalisation of ROCK & ROLL: A deductive object-oriented database system
A. A. A. Fernandes, M. L. Barja, N. W. Paton and M. H. Williams 379

Towards greater flexibility in software design systems through hypermedia functionality
H. Oinas-Kukkonen 391
Issues in estimating real-time data communications software projects
C. S. Murali and C. S. Sankar 399
Enhanced reusability via polymorphic additive virtual methods in C++
R. Chattamvelli and H. Saiedian 403
Measuring perceived software quality
M. Xenos and D. Christodoulakis 417
A comparison of techniques for developing predictive models of software metrics
A. R. Gray and S. G. MacDonell 425
Process to identify disjoint subclasses and class life cycle information using a role analysis technique
S. Y. Liao 439

Number 7

An evaluation of extended entity–relationship model
H. Saiedian 449
Abstraction and analogy in cognitive space: A software process model
H. Zhuge, J. Ma and X. Shi 463
Estimating software development effort with connectionist models
G. Wittig and G. Finnie 469
Implementation of locking schemes in extended dependency graphs
T. M. Schreck and Z. Chen 477
Mapping Petri nets to concurrent programs in CC++
W. Yao and X. He 485
Metrics for quality analysis and improvement of object-oriented software
C. Ebert and I. Morschel 497

Number 8

Using Z to specify object-oriented software complexity measures
T. K. Shih, C.-C. Wang and C.-M. Chung 515
Ethnography and information systems development: Ethnography of, for and within IS development
P. Beynon-Davies 531
Code-based analysis of the development effort of a large scale courseware project
I. M. Marshall, S. Price, P. I. Dugard, P. Hobbs and W. B. Samson 541
Lessons learned from rigorous system software development
J. Dick and E. Woods 551
Distributed multimedia synchronization specifications using M^2EST
C.-M. Huang, Y.-I. Chang, C.-H. Lin and J.-S. Chen 561

Number 9

Synchronous sequence charts in action
L. Feijs 583
Database tools to acquire knowledge for rule-based expert systems
M. M. O. Owrang and F. H. Grupe 607
Compiler test case generation methods: a survey and assessment
A. S. Boujarwah and K. Saleh 617
Factors affecting completing of the requirements capture stage of projects with different characteristics
P. D. Chatzoglou 627
A processing framework for object comprehensions
D. K. C. Chan and P. W. Trinder 641

Number 10

User–database interaction at the knowledge level of abstraction
H. C. Chan and R. C. Goldstein 657
Structured design with mathematical proofs
C.-C. Chiang 669
Integrating logical video and audio segments with content-related information in instructional multimedia systems
H. W. Agius and M. C. Angelides 679
A survey of current practice in the development of multimedia systems
C. Britton, S. Jones, M. Myers and M. Sharif 695
Software diversity: practical statistics for its measurement and exploitation
D. Partridge and W. Krzanowski 707
On the effectiveness of test case allocation schemes in partition testing
F. T. Chan, T. Y. Chen and T. H. Tse 719

Number 11

Editorial
Evaluation and assessment in software engineering
B. Kitchenham, P. Brereton, D. Budgen, S. Linkman, V. L. Almstrum and S. L. Pfleeger 731
Experimental validation in software engineering
M. V. Zelkowitz and D. Wallace 735

Experiences introducing a measurement program
S. De Panfilis, B. Kitchenham and N. Morfuni 745
A subjective effort estimation experiment
M. Höst and C. Wohlin 755
An empirical evaluation of defect detection techniques
M. Roper, M. Wood and J. Miller 763
Experimentation as a vehicle for software technology transfer — A family of software reading techniques
S. Linkman and H. D. Rombach 777
Perspective-based reading of code documents at Robert Bosch GmbH
O. Laitenberger and J.-M. DeBaud 781

Number 12

Introduction to IST Special Issue on Information System Quality
I. Eriksson and A. Törn 797
Information systems quality versus software quality — A discussion from a managerial, an organisational and an engineering viewpoint
L. A. von Hellens 801
Challenges to IS quality
T. Dahlberg and J. Jarvinen 809
From information systems quality to sustainable business quality
H. Salmela 819
Use Quality and the World Wide Web
K. Lindroos 827
Information systems work quality
T. Andersson and L. A. von Hellens 837
Maintaining IS quality
E. B. Swanson 845

Number 13

A combination of the Mk-II Function Points software estimation method with the ADISSA methodology for systems analysis and design
P. Shoval and O. Feldman 855
Phase containment metrics for software quality improvement
A. R. Hevner 867
An empirical study of coupling and control flow metrics
E. Ferneley 879
Construction of classification trees via the classification-hierarchy table
T. Y. Chen and P. L. Poon 889
Linearity in directory growth of the multilevel grid file
S.-W. Kim, K.-Y. Whang and J.-H. Kim 897

Numbers 14–15

Verifying task-based specifications in conceptual graphs
J. Lee and L. F. Lai 913
A meta-model for method integration
M. Saeki 925
Perceptions of system development failures
J. J. Jiang, G. Klein and J. Balloun 933
An evaluation of methods for prioritizing software requirements
J. Karlsson, C. Wohlin and B. Regnell 939
Use of software systems development methods. An empirical study in Brunei Darussalam
M. M. Rahim, A. H. Seyal and M. N. A. Rahman 949
A fault-tolerant object service in the OMG's object management architecture
D. Liang, S. C. Chou and S. M. Yuan 965
Error detection and diagnosis for fault tolerance in distributed systems
K. Saleh and K. Al-Saqabi 975
Searching the world wide web: an evaluation of available tools and methodologies
C. Jenkins, M. Jackson, P. Burden and J. Wallis 985
Towards deeper co-understanding of software quality
I. Tervonen and P. Kerola 995

Volume 40

Number 1

Conceptual modelling-based design of object-oriented databases
G. Kovács and P. van Bommel 1
Reuse of components in data-intensive business programs through interface separation
H. B. K. Tan and H. K. Tan 15
File allocation with balanced response time in a distributed multi-server information system
W. Cai and B.-S. Lee 27
The evaluation of the response time for a tourist agency's service system
A. Zgrzywa 37
An effective class hierarchy concurrency control technique in object-oriented database systems
W. Jun and L. Gruenwald 45

Number 2

Modelling the probabilistic behaviour of function point analysis
C. Yau and H.-L. Tsoi 59

Asset-based system and software system development — A frame-based approach
J. Karimi and M. K. Zand 69
An object-oriented database model for a change management framework in workgroup computing systems
S.-Y. Huh 79
Active help found beneficial in wizard of oz study
J. S. Davis 93
Slicing algebraic specifications
M. R. Woodward and S. P. Allen 105

Number 3

RolEnact: role-based enactable models of business processes
K. T. Phalp, P. Henderson, R. J. Walters and G. Abeysinghe 123
A framework and patterns for the specification of reactive systems
L. Barroca and P. Henriques 135
Analysis and design of co-operative work processes: a framework
S. Nurcan 143
A model of schema versions for object-oriented databases based on the concept of rich base schema
S.-W. Lee and H.-J. Kim 157
Putting requirement management into praxis: dealing with nonfunctional requirements
C. Ebert 175

Number 4

Software engineering education: an international perspective
H. Saiedian 191
A model for the software engineering component of a computer science curriculum
D. J. Bagert 195
Teaching programming by teaching principles of reusability
R. Biddle and E. Tempero 203
The group education and training: IT's basic courses in Philips
J. J. van Amstel 211
Distributed group working in software engineering education
P. Brereton, S. Lees, M. Gumbley, C. Boldyreff, S. Drummond, P. Layzell, L. Macaulay and R. Young 221
Teaching software engineering to a mixed audience
M. Godfrey 229
Applying an operational formal method throughout software engineering education
A. E. K. Sobel 233
Teaching what they need instead of teaching what we like — the new software engineering curriculum at the University of Stuttgart
J. Ludewig and R. Reißing 239
Using the World Wide Web to assist software project course work
K. Alho 245

Numbers 5–6

Abstraction orientated property of software and its relation to patentability
T. Tamai 253
A new generalized software complexity metric for distributed programs
W.-J. Tsaur and S.-J. Horng 259
COMX: a design methodology using communicating X-machines
J. Barnard 271
CONCORD: an environment of CONstruction, CORrection anD transformation of algorithms
D. E. Zegour and G. Levy 281
Implementation and timing analysis of Clock Synchronization on a transputer-based replicated system
A. Sinha, P. K. Das and D. Basu 291
Enacting object-oriented methods by a process environment
J.-Y. J. Chen and S.-C. Chou 311
Indexing bitemporal databases as points
B. C. Ooi, C. H. Goh and K.-L. Tan 327
A qualitative empirical study of case tool support to method learning
L. B. Eriksen and J. Stage 339
A new heuristic for test suite reduction
T. Y. Chen and M. F. Lau 347

Number 7

Formal specification of visual languages
D. M. Gee 359
Migration of sequential systems to parallel environments by reverse engineering
R. Erraguntla and D. L. Carver 369
Providing workflow services using a programmable hypermedia environment
C. Kacmar, J. Carey and M. Alexander 381

EAMMO: an environmental agent model for multiple objects
N. Ito, K. Nakagawa, T. Hotta, X. Du and N. Ishii 397

Number 8

Construction of an FPA-type metric for early lifecycle estimation
G. Horgan, S. Khaddaj and P. Forte 409
Management science semantics for object-oriented business modelling in BPR
M. Glykas and G. Valiris 417
A logic based language for networked agents
D. Xu, G. Zheng and X. Fan 435
Method engineering for industrial real-time and embedded systems
A. Alderson, M. E. C. Hull, K. Jackson and L. E. Griffiths 443

Number 9

VC[1]—a formal language for the specification of diagrammatic modelling techniques
J. A. Serrano and R. Welland 463
Foundation of the taxonomic object system
A. M. Zendler 475
The application of case-based reasoning to the software development process
F. H. Grupe, R. Unwiler, N. K. Ramarapu and M. Owrang 493
The usage of systems development methods: are we stuck to old practices?
J. Iivari and J. Maansaari 501

Number 10

How to formalize it? Formalization principles for information system development methods
A. H. M. ter Hofstede and H. A. Proper 519
Toward a better understanding of idea processors
Z. Chen 541
A computational tool that supports formal diagnosis of process design
P. Ramos and J. L. Fiadeiro 555

Numbers 11–12

Foreword
M. Weiser 575
Program slicing
M. Harman and K. B. Gallagher 577
The application of program slicing to regression testing
D. Binkley 583
Conditioned program slicing
G. Canfora, A. Cimitile and A. De Lucia 595
Dynamic dependence in term rewriting systems and its application to program slicing
J. Field and F. Tip 609
Application of program slicing in algorithmic debugging
M. Kamkar 637
Dynamic program slicing methods
B. Korel and J. Rilling 647
Validation of measurement software as an application of slicing and constraint solving
J. Krinke and G. Snelting 661
Restructuring programs by tucking statements into functions
A. Lakhotia and J.-C. Deprez 677
Program slices as an abstraction for cohesion measurement
L. M. Ott and J. M. Bieman 691
Program analysis via graph reachability
T. Reps 701

Number 13

The CAP framework for business process modelling
K.T. Phalp 731
Productive engineering of predictable embedded real-time systems: the road to maturity
T. Vardanega and J. van Katwi 745
On the effectiveness of classification trees for test case construction
T.Y. Chen and P.L. Poon 765
A simulation study on some heuristics for test suite reduction
T.Y. Chen and M.F. Lau 777

Number 14

Evaluation and assessment in software engineering 1998
Stephen Linkman 793
An empirical view of inheritance
M. Cartwright 795
A comparison bewteen software design and code metrics for the prediction of software fault content
M. Zhao, C. Wohlin, N. Ohlsson and M. Xie 801
Combining empirical results in software engineering
L.M. Pickard, B.A. Kitchenham and P.W. Jones 731
Templates and tariffs — tools for empirical studies
B. Khazaei, J. Siddiqi, R. Osborn and C. Roast 823

A project effort estimation study
M.C. Ohlsson, C. Wohlin and B. Regnell *831*
Reusability and maintainability in hypermedia applications for education
E. Mendes, R. Harrison and W. Hall *841*
A basis for evaluation of commercial software
D.J. Carney and K.C. Wallnau *851*
An empirical quality measure based on complexity values
M. Pighin *861*
Improving the quality of ISO 9001 audits in the field of software
A.J. Walker *865*
A reengineering process using early decomposition and simple tools
R.J. Leach, C.A. Charles, K. Fagan, T. Kimbrough, K.R. Thomas *871*

KEYWORD INDEX

Information and Software Technology, volumes 36–40

INFORMATION AND SOFTWARE TECHNOLOGY

Keyword index

Abstraction
Generalization, Meta-levels, Programming knowledge, Development method **38,** 37
Specification, Model, Mathematics **38,** 323
Analogy, Software process model **39,** 463
Intellectual property right, Patentability **40,** 253

Abstraction levels
User–database interface, Entity–relationship model, Knowledge level, Relational model, SQL **39,** 657

Active database
Formal specification, Active rules **37,** 47
Objective-oriented databases, Rule-based specification **37,** 203
Production rules, Object-orientated databases **37,** 691
Production rule, Rule compilation, Discrimination network **39,** 331

Active functionality
Event-condition-action rules, Object-oriented paradigm **36,** 555

Active help
Passive help, On-line help, User model, Artificial intelligence **40,** 93

Active rules
Formal specification, Active database **37,** 47

Active software engineering database
Trigger, Role concept **37,** 580

Actor systems
Object-oriented modelling, Class-based systems, Frame-based systems, Terminological systems, Semantic data models **38,** 47

ADA
GUI, OOD **36,** 743

Ada programs
AIDA, Dynamic analysers **36,** 107

Adaptive systems
Knowledge base management systems, physical design **37,** 659

Additive methods
Assistant functions, Late binding, Multiple inheritance, Virtual tables **39,** 403

ADISSA methodology
Software metrics, Software estimation, Project management, Function points analysis, Mk-II FP model, Systems analysis and design, ADISSA methodology **39,** 855

ADT
FDT, LOTOS, Specification of communication protocols, Communication software **38,** 555

Aerospace software
Software process modelling, Software practice **37,** 623

Agent models
Multiple objects, Soccer games **40,** 397

AIDA
Ada programs, Dynamic analysers **36,** 107

Algebraic language theory
Distributed applications, Methodologies, Representation, Very high-level languages, Specification techniques, Electronic mail **39,** 583

Algebraic Petri nets
Formal methods, Structured analysis **37,** 411

Algebraic specification
Parallel programs, Temporal logic **38,** 181
Slicing, Generalized slice, OBJ, Slice-based metrics, Cohesion **40,** 105

Algorithm
Automaton, Proof, Symbolic evaluation, Transformation, Compiler **40,** 281

Algorithmic debugging
Program slicing **40,** 637

Alternating bit protocol
X-machines, Communicating X-machines, Communication, Ports **38,** 401

Amalgamation
Specification, Viewpoints **36,** 43

Analogy
Abstraction, Software process model **39,** 463

Analysis
Methods, Object-oriented **37,** 155

Analysis and design methodology
CASE, Subsystems **37,** 79

Analysis methods
Object-orientated analysis, Modelling **36,** 67

Analysis techniques
Metrics, Predictive models **39,** 425

Anchoring
Hypermedia, Content-based retrieval from video **36,** 213

Application protocols
Estelle, ASN.1, Endcoding/decoding, Data abstraction, EASE **38,** 757

Applicative programming
Functional programming, Executable specification **37,** 293

Artificial intelligence
Active help, Passive help, On-line help, User model **40,** 93

PII: S0950-5849(98)00115-3

Brainstorming, Computational creativity, Idea processors, Creativity support systems **40,** 541
Artificial neural networks
Software estimation, Metrics **39,** 469
ASN.1
Estelle, Application protocols, Endcoding/decoding, Data abstraction, EASE **38,** 757
Assertional reasoning
Distributed systems, Petri nets **38,** 521
Assessment
Software maintenance, Process maturity **38,** 701
Assessments
Quality management, ISO 9001, Audits, Checklists, Software engineering standards **40,** 865
Asset-based systems development strategy
Software reuse, Frame-based implementation, Software design **40,** 69
Assistant functions
Additive methods, Late binding, Multiple inheritance, Virtual tables **39,** 403
Association
Object modelling, object relationship **37,** 443
Asymptotic directory growth
Multilevel grid files, Multi-attribute accesses, Multidimensional file organizations, Data distributions, Data skew, correlation **39,** 897
Atomic broadcast
Fault-tolerance, Replication, State-machine, Digital signatures, Transputers **38,** 633
Attribute grammars
Relation model, Language-based editing systems **39,** 261
Audits
Quality management, ISO 9001, Assessments, Checklists, Software engineering standards **40,** 865
Authoring systems
Multimedia **36,** 259
Automated analysis
Systems analysis methodologies, System modelling, Ontology, Meta-modelling **38,** 281
Automated hardware synthesis
High-level synthesis, hardware compilation **37,** 493
Automated testing
Test cases, Compiler testing **38,** 111
Automaton
Algorithm, Proof, Symbolic evaluation, Transformation, Compiler **40,** 281

B AMN
Formal development, Industrial application of formal methods **37,** 303
Behavioural and incremental inheritance
Object-oriented development, Subtyping **37,** 539
Behavioural model
Object-oriented methodology **38,** 657
Binary relational model
Hypermedia, Semantic databases **36,** 323
Bitemporal databases
Valid time, Transaction time, Spatial access methods, R-trees **40,** 327
Black box testing
Category-partition method, Classification-hierarchy table, Classification tree, Test case selection **39,** 889
Book reviews **36,** 53, 373, 637, 752, **37,** 253, 395, 521
BPR methodology

Brainstorming
Artificial intelligence, Computational creativity, Idea processors, Creativity support systems **40,** 541
Business analysis
IT planning, CASE tool, Critical success factors, CSF, Requirements determination, Information systems, Business analysis **39,** 311
Business modelling tool
Business re-engineering, Conceptual model **38,** 355
Business modelling tools
BPR methodology, Development model **40,** 417
Business process
Framework, Methods, Enaction, Measurement **40,** 731
Business process modelling
Business process reengineering, Role activity diagrams, Communicating sequential processes **39,** 107
Business process reengineering
Workflow, Hypermedia, Petri-net **40,** 731
Business re-engineering
Conceptual model, Business modelling tool **38,** 355

C++
Object-orientation, Persistent programming languages **36,** 119
Capacity planning
Proactive approach, Performance modelling **39,** 195
Cardinality formalizations
Validation, Conceptual specification **37,** 572
CASE
Semantic correspondence, Integration **36,** 87
Software evaluation and selection, Computer aided systems engineering **36,** 267

MetaCASE, Matrix **36,** 361
Software process models, Soft systems methodology **36,** 587
Subsystems, Analysis and design methodology **37,** 79
Structured methods, Customization **37,** 467
Computer-aided software engineering, CASE Application products, Size measurement, Size estimation, Software process modelling **38,** 391
Domain analysis, Software reuse **38,** 165
MetaCASE **38,** 261
Software process, Software development, Process model, PSEE **38,** 289
Process effort, Software metrics **39,** 35
Systems emergence, Multimedia tools, Computer-based learning **39,** 323
Modelling transparency, Integration, Hypertext **39,** 391
Real-time and embedded systems, Development method, System development, MetaCASE **40,** 443
Systems development methods, Methodologies, Method use **40,** 501

CASE application products
Computer-aided software engineering, CASE, Size measurement, Size estimation, Software process modelling **38,** 391

CASE failure
Computer-aided software engineering, Non-use phenomenon **36,** 531

CASE implementation
User perceptions, Tool related problems **36,** 643

CASE repository
Data integration, Tool interconnection, Software design **38,** 173

CASE tool
Design methodology, Parallel system **36,** 413
IT planning, Critical success factors, CSF, Requirements determination, Information systems, Business analysis **39,** 311
Software engineering education, Method learning, Empirical study **40,** 339

CASE tools
Parallel processing, Parallel software development methodologies **36,** 381
Database design, Genetic algorithms **36,** 725
Parallel software, Design method, Process-object approach, Relational model, Repository **39,** 235

Case-based reasoning
CBR, Software development, Function point analysis, Systems analysis, Systems design, Software reusability **40,** 493

Case studies
Real-time embedded software, Software development processes, Quantitative analyses **40,** 745

Category theory
Conceptual data modelling, Meta modelling **39,** 15

Category-partition method
Black box testing, Classification-hierarchy table, Classification tree, Test case selection **39,** 889

CBR
Case-based reasoning, Software development, Function point analysis, Systems analysis, Systems design, Software reusability **40,** 493

CC++
Petri nets, Concurrent programming, Translation **39,** 485

CCS
Design extraction, Concurrency **36,** 675
Refinement, Concurrency **37,** 557

Censored production rules system
Certainty factor, Production rules system **36,** 155
Production rules systems, Specificities **37,** 453

Certainty factor
Censored production rules system, Production rules system **36,** 155

Certification
Software re-engineering, Software reuse, Metrics, Domain analysis **40,** 871

Chaining
Software development, Distributed programs, Test data generators **38,** 343

Change management
Estimation deployment, Force-Field Analysis **37,** 665

Change management
Software maintenance, Process improvement **38,** 723

Chat

Communications software engineering, Estelle, Reverse engineering **38,** 379
Top-down development
Taxonomic object system, Object-oriented methods, Classification, Software reuse **40,** 475
Training and education
Management, IT barriers **38,** 783

Training
Formal methods, Marketing, Simulation, Education, Reusable framework **38,** 313
Transaction processing systems
Heterogeneous distributed computing systems, Real-time control and coordination, Object-oriented computing, Logic programming **39,** 171
Transaction
DBMS, Concurrency control, SQL, Client-server **38,** 103
Transaction time
Bitemporal databases, Valid time, Spatial access methods, R-trees **40,** 327
Transformation
Algorithm, Automaton, Proof, Symbolic evaluation, Compiler **40,** 281
Transformational implementation
Jackson System Development (JSD), Software tools **36,** 515
Translation
Petri nets, CC++, Concurrent programming **39,** 485
Transputers
Fault-tolerance, Replication, State-machine, Atomic broadcast, Digital signatures **38,** 633
Clock Synchronization, Fault-tolerant systems design, Finite state model, Timing analysis **40,** 291
Tree query
Dynamic programming, Principle of optimality **39,** 149
Trigger
Active software engineering database, Role concept **37,** 580
Trip planning
Object-oriented databases, Object-oriented modelling, Route planning, Multi-modal transportation **38,** 409
Two-headed
Query, Request, Disk, Scan, Simulation **39,** 253
Two-headed disks
Single-headed disks, Shadowed disks, Mirrored disks, Seek distance, Seek time, Performance evaluation **39,** 125
Type assignment
Domains, Data typing **37,** 165

Undergraduate
Software engineering education, Mixed audience, Professional master's degree **40,** 229
Undergraduate curriculum
Formal method, Software engineering education **40,** 233
Unit repeated inheritance
Software metrics, Inheritance hierarchy, Inheritance level technique, *Z* specification **39,** 515
Update propagation
View maintenance, Complex event detection **37,** 479
Use quality
User types, WWW, Information systems **39,** 827
User interface
NF^2 relational model, Query processing, Logic programming, Prolog-based knowledge representation **38,** 11
User model
Active help, Passive help, On-line help, Artificial intelligence **40,** 93
User participation
Project planning, Human factors, IS project teams **39,** 627
User perceptions
CASE implementation, Tool related problems **36,** 643
System failures, Expectation failure theory **39,** 933
User performance
Query language, User understanding, English feedback, Empirical evaluation, Entity relationship model **39,** 141
User satisfaction measurements
Software quality assurance, Software metrics **39,** 417
User types
Use quality, WWW, Information systems **39,** 827
User understanding
Query language, English feedback, Empirical evaluation, User performance, Entity relationship model **39,** 141
User–database interface
Abstraction levels, Entity–relationship model, Knowledge level, Relational model, SQL **39,** 657

Valid time
Bitemporal databases, Transaction time, Spatial access methods, R-trees **40,** 327
Validation
Conceptual specification, Cardinality formalization **37,** 572
Validation
Model-based formal methods, Vienna Development Method (VDM) **36,** 699
Variation removal
Source code, Rewriting **38,** 25
Verification
Conceptual model, Task-based specifications, Conceptual graphs **39,** 913
Communicating X-machine, COMX, Formal specification **40,** 271

Very high-level languages
Distributed applications, Methodologies, Representation, Specification techniques, Algebraic language theory, Electronic mail **39,** 583
Vienna Development Method (VDM)
Model-based formal methods, Validation **36,** 699
View
Schema version, Schema evolution, Schema integration **40,** 157
View integration
Software process modeling, Information systems requirements analysis **39,** 205
View maintenance
Complex event detection, update propagation **37,** 479
Viewpoints
Amalgamation, Specification **36,** 43
Method integration, MetaCASE, Method engineering **38,** 267
Virtual tables
Additive methods, Assistant functions, Late binding, Multiple inheritance **39,** 403
Virtual teams
Software development, Shift work **38,** 647
Visualization
Data modelling, Interface evaluation **36,** 597
Vote-counting
Empirical studies, Meta-analysis, Software engineering **40,** 811
Voting strategies
Diversity measures, Inductive programming, Multiversion systems, Neural computing, Software diversity **39,** 707

Waterfall approach
Prototyping, Software development approaches **38,** 743
Wavefront requirements process
Software process, Process models, Process, Goals/questions/metrics **38,** 507
Web
Search, Retrieval **39,** 985
Window-based interfaces
Data acquisition and control systems, Interface technology **36,** 733
Workflow
Co-operative work, Group-oriented models **40,** 143
Hypermedia, Petri-net, Business process reengineering **40,** 381
World Wide Web
Software engineering education, Software project, Computer-assisted education **40,** 245
WWW
Use quality, User types, Information systems **39,** 827

X-machines
Communicating X-machines, Communication, ports, Alternating bit protocol **38,** 401

Yourdon data-flow diagrams
Software development process, Specification language, Jackson data structure diagrams **40,** 359

Z notation
Telephony, Formal specification **37,** 277
***Z* specification**
Software metrics, Inheritance hierarchy, Unit repeated inheritance, Inheritance level technique **39,** 515
